A claim-to-source worksheet

FREE RESOURCE / PRIVATE REVIEW COPY

Use one sheet for one precise question. Leave unknown fields visible. This worksheet records reading and questions; it does not recommend a treatment. No email signup is needed for this review copy.

1. Define the question

Claim in my own words: _____

Condition and stage (prevention or treatment): _____

Population: _____

Drug/formulation/route: _____

Comparator: _____ Outcome and follow-up: _____

2. Identify what I read

Title and publication year: _____

DOI, registry ID or stable URL: _____

Date checked: _____ Full text / abstract / registry / discussion

Source type and study-family label: _____

3. Preserve the result

Estimate, units, numerator/denominator: _____

Uncertainty interval and timepoint: _____

Exact page, table, figure or section: _____

Reported finding in one sentence: _____

_____

Keep the limits attached

4. Check the match

People, condition stage, formulation/route, comparator, outcome, timing:

What matches my question? _____

What does not match? _____

What cannot be checked from the available source? _____

5. Keep open questions visible

Harm information checked, exposed group and observation time: _____

_____

Important design or missing-data limitation: _____

Possible overlapping report: _____

Current official status/source/jurisdiction checked: _____

Correction or retraction check/date: _____

6. Prepare the next conversation

My most important unresolved question: _____

_____

Source I will bring: _____

What would change my understanding? _____

_____

Companion: Second Look Evidence Reading Guide, edition 0.1, 8 October 2026. This original checklist organizes questions; it is not a validated clinical instrument. Human editorial review and comprehension testing are pending. Keep private health details out of public shared notes.
